Bentley Institute's Learn offerings are strategically designed to help you benefit from the most cost-effective blend of technology and support, so you can tackle the world's great infrastructure challenges—today. From instructor-led virtual classes to on-demand courses, we have a training option for you.

The future of the infrastructure industry depends on today's students. **Bentley's Academic Program** prepare students for careers with great companies. Students can gain a competitive edge in the classroom and with potential employers. In turn, infrastructure industry professionals can recruit qualified applicants and higher quality talent. The program provides access to the software and training you need to learn best practices for advancing infrastructure.

## Memorandum of Understanding (MoU)

Signing an MOU will bridge the gap between industry and institute. It will help the institute to get the latest legal version software from Autodesk free, the complete process will be taken care by Medini an Autodesk Academic Partner. Totally 15 software includes out of which AutoCAD, Revit Architecture, 3DS Max are the mostly used software in Architectural Industry. The duration for MoU will be for three years, the license will get for three years free. The intention of MoU and free software is to educate the next generation with the latest trends before entering to the market. That's what industries are looking for, no industry wants to invest again on employee training. And being an Autodesk company it's our duty to educate. The sample of MoU is attached kindly go through. Definitely it will be useful.

## Training Details

Quality and Satisfaction form the core ethics of our training program; we always make sure that our program is as per the needs of the students and requirements of the industry. We basically concentrate on the level of students' understanding and make them proficient in the software. Architecture Engineering & Construction companies use Autodesk products, helps us to get regular updates with respect to the requirement of them. The content of the program is the one used worldwide, preferred by Autodesk & we make sure that it merges with the curriculum. We make sure that we work as a team member of your esteemed institute, which will definitely end up with student's performance:

Work with knowledgeable instructors in quiet classroom settings utilizing sample projects and exercises that emphasize real-world, practical applications

- ✓ **Complete computer lab shall be taken care by MEDINI, with respect to the installation of software included in training.**
- ✓ **Licensed & latest version of Autodesk software such as AutoCAD, Revit Architecture, 3DS max etc which are essential for Architecture will be installed at the lab and will support the students also to get installed for their works, which is most important.**
- ✓ **The school will be a part of certification testing center for Autodesk, Adobe.**
- ✓ **Learn from highly qualified instructors at superior facilities**
- ✓ **Support for curriculum projects & thesis.**
- ✓ **Regular updates of new technology in industry**
- ✓ **Involvement of lecturers & Students in different kinds of activities which will improve their knowledge by meeting different industry people.**
- ✓ **Support for internships**
- ✓ **Developing skills with sample projects and exercises that emphasize real-world applications**
- ✓ **Earn a valuable certificate of completion that's recognized in your profession**
- ✓ **Earn an industry-recognized credential that helps prove your skill level and can get you hired.**
- ✓ **Accelerate your professional development and help enhance your credibility and career success.**

- ✓ **Validate your skills and join an elite team of Autodesk Certified professionals.**
- ✓ **Display your Autodesk Certified certificate, use the Autodesk Certified logo, highlight your achievement and get noticed by listing your name in the Autodesk Certified Professionals database**

## Industry Customer Success Stories

### **Access Architects, Mumbai. — Mr. Atul Shah Principle Architect Revit & Navisworks**

“We wanted our design to fit into the local context respectfully, while clearly stating its orientation towards the future. The design goal was to create a façade that would give this hotel building a sense of largess, of generosity.”

“Using traditional modeling techniques, this project would have taken at least a few months; working with different combinations in single site and trying to place it correctly would have been far more complex and time consuming without Autodesk BIM solutions.

### **TATA Consulting Engineers Limited Autodesk REVIT, AutoCAD Civil 3D.**

“We are delighted with the results we have achieved so far using Autodesk BIM technology for industrial project, I am very proud of our team’s efforts. The project looks fantastic when matched into the aerial footage thus making perfect utilization of land. BIM not only creates a more efficient process for our services but also maximizes our level of ability to serve our customers more effectively. Overall, a winning situation.”

### **Honeywell Aerospace— Mr. Ramaiah Chowdary Sr.Engineer -AERO AME-VE MECH ISC Autodesk Moldflow**

“This job was complex due to the fact that the part cannot be modified structurally because that would affect its integrity. Reducing a part warpage was an important aspect in order to keep precision within the limits to ensure a proper part assembly. However, it was challenging to control or eliminate the defect merely based upon the experience and molding knowledge. To make a confident decision, a specialized tool like Autodesk Moldflow is a must”

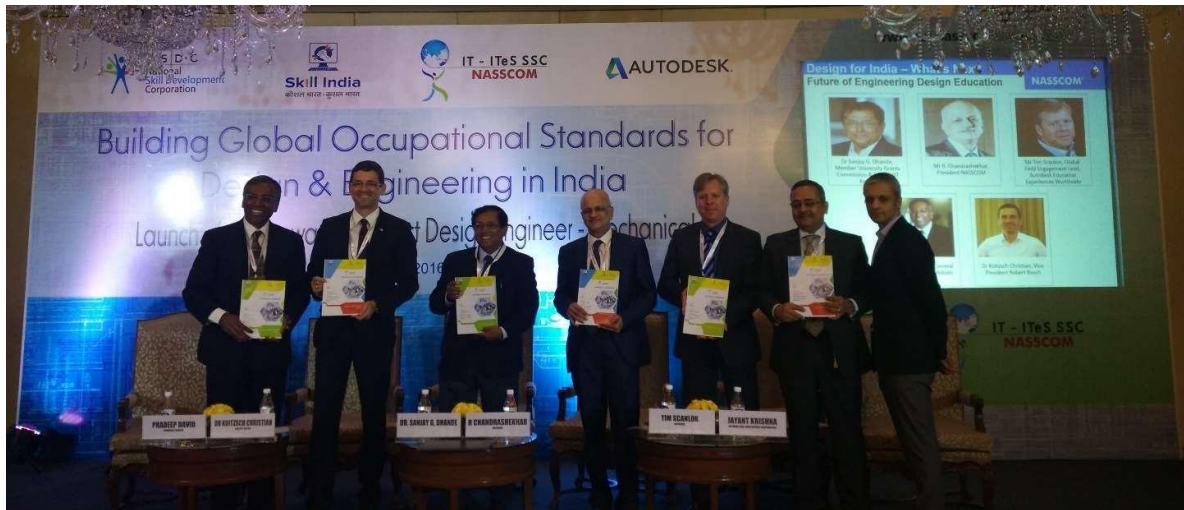

### **Cory Dippold, Project Technology Director, Hatch Mott MacDonald**

Autodesk Consulting Helps Hatch Mott MacDonald Define the Right BIM Tools

“Thanks to Autodesk Consulting, we are implementing and delivering a successful BIM approach on more projects. This is driving growth and integration of new technologies that complement BIM.”

## Building Global Occupational Standards for Design & Engineering in India

With a focus on bridging employability gaps within the industry SSC NASSCOM has partnered with Autodesk and other industry members with a new standardized courseware **‘Product Design Engineer – Mechanical’**, so as to enhance skilling in this field. This courseware will empower students in India with the required competencies at the entry level within the larger occupation of Product Engineering Design in the Engineering Research & Development (ERD) sub-sector of the industry. This courseware will help create a skilled talent pool, trained on global standards, with the ability to usher in a design-led future of making things.
